

BLACK SERIES
BLACK CAVIAR

Raw Material: Black caviar from Jiri Mountain, Republic of Korea

Active ingredient: Caviar Peptides

Black caviar is caviar consisting of the roe (or eggs) of the beluga sturgeon *Huso huso*. As a source of vitamins and minerals, black caviar extract has proven to stimulate skin cells and minimizes the appearance of pores by retexturing the skin.

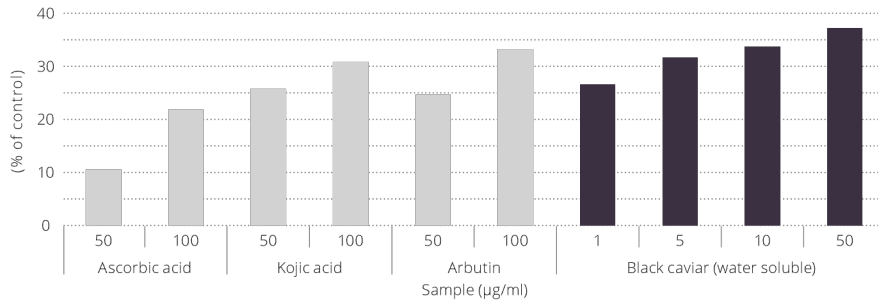

MARINE BIOTECHNOLOGY PRODUCTS

- + **Sturgeon grown in Korean pristine area**
- + **Whitening**
- + **Anti-wrinkle**
- + **Anti-inflammation**
- + **Moisturizing**

Whitening

The inhibitory effect of melanin production by Black caviar.

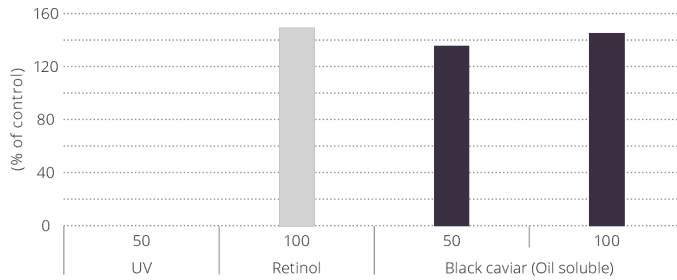

Inhibition of melanin synthesis

Anti-Wrinkle

The inhibitory effect of total MMP-1 expression.

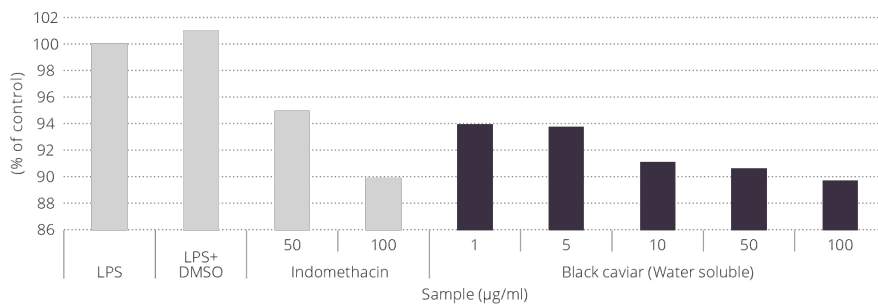

Inhibition of total MMP-1

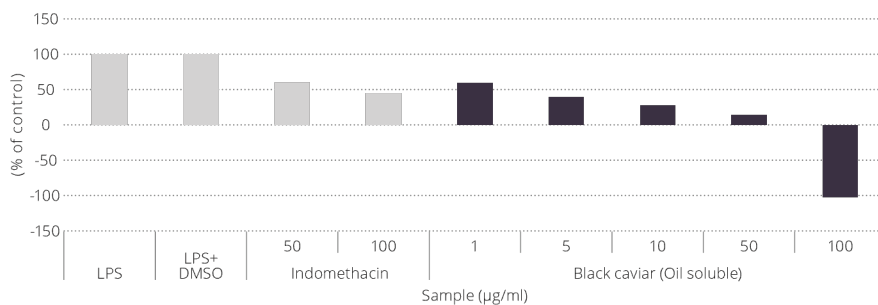

Anti-inflammation

Black caviar reduces cytokines released when animal cells begin immune response.

Inhibition of IL-6 release

Inhibition of TNF-α release

CATEGORY NAME
Black Series

PRODUCT NAME
Black Caviar

INCI NAME
Caviar extract

SOLUBILITY
Water soluble
Oil soluble

- Decolorization
- Deodorization
- Desalination
- Fermentation
- Low molecular
- Low particle size
- 9x steaming & drying
